Consent of a Parent/Guardian is necessary for dental treatment of a minor. I give permission for dentists of Pediatric Dentistry & Orthodontics to use diagnostic measures deemed necessary in his/her professional judgement to render the best dental treatment to my child. This may include but is not limited to an oral evaluation, cleaning, dental x-rays, and/or fluoride application at the time of an initial visit, routine visit or consultation. The information I have given is accurate to the best of my knowledge and it will be held in the strictest of confidence according to HIPPA laws and regulations. It is my responsibility to inform the dentist of any changes to my child's health status.

A LEGAL GUARDIAN FOR THE CHILD MUST COMPLETE THIS FORM.

REQUEST AND CONSENT FOR DENTAL TREATMENT

Please read this form *carefully*. If you do not understand something to your satisfaction, please ask questions. We will be pleased to explain it.

1. I request and authorize the dental treatment by the doctor(s) and staff at Pediatric Dentistry & Orthodontics.

   Patient Name: _____

2. I am the legal guardian of the child named above. **Initials** _____

3. I request and authorize the following dental procedures to be done for my child:

☐Comprehensive dental examination ☐Radiographs (X-Rays), ☐Prophylaxis (dental cleaning), ☐Fluoride application, ☐Restorations (fillings), ☐Stainless steel crowns, ☐Extractions, ☐Nitrous Oxide (Laughing gas) ☐Space maintainers.
☐Pulp treatment (root canal treatment, pulpotomy, pulp cap, pulpectomy)
☐Sealants

4. I further request and authorize the re-taking of dental x-rays if needed and the use of such local anesthetics as may be considered necessary to treat my child's dental need(s).

5. I have had explained to me by the dentists and staff, and have had sufficient opportunity to discuss the patient's dental condition/problem(s), the planned procedures and treatment, and the benefits to be reasonably expected from this treatment plan, compared with alternative approaches and/or no treatment.

6. It is unusual for any of the following risks or complications to occur. These risks or complications include but are not limited to, the possibility of pain or discomfort during the treatment, swelling, infection, bleeding, injury to adjacent teeth and surrounding tissue, development of a temporomandibular joint disorder, temporary or permanent numbness, and allergic reactions.

7. **I understand** that during the course of the patient's dental treatment, something unexpected may arise that may necessitate procedures in addition to or different from those listed on the patient's treatment plan and that I will be consulted *prior to initiation of treatment procedures* not listed. I am aware that the practice of dentistry is not an exact science and acknowledge that no guarantees have been made to me concerning the results of the dental treatment that the patient receives in our office.

8. **I understand** it is the goal of this dental office to accomplish dental treatment by the use of warmth, friendliness,

persuasion, humor, charm, gentleness and kindness and understanding. **I understand** that treatment for children includes efforts to guide their behavior by helping them to understand the treatment in terms appropriate for their age. Behavior will be guided using praise, explanation and demonstration of procedures and instruments, using variable voice tone and loudness.

9. **I understand** that should the patient become uncooperative during dental procedures with movement of the head, arms and/or legs, dental treatment cannot be safely provided. During such disruptive behavior, it may be necessary for the assistant(s) and or doctor to hold the patient's hands, stabilize the head and/or control leg movements for their safety. I also understand the routine use of "tooth pillows" (mouth props) may be necessary to be sure a child does not accidentally close their teeth while an instrument is in their mouth that could harm them. I also understand that mouth props are sometimes necessary if a child refuses to open their mouth.

   Initials _____

10. **I understand** that it is not an uncommon response for children to cry before or during dental treatment or directly afterward when they see their parent. **I understand** the only way I can guarantee my child will not cry or be unhappy during dental treatment is if I elect to have their treatment completed in the operating room under general anesthesia.

11. **I further understand** that should the patient become uncooperative during dental procedures with excessive body movements, or is not able to tolerate the procedure, the treatment would be stopped and alternate treatment plan will be discussed.

12. All of my questions have been answered to my satisfaction and I consent to the treatment and procedures prescribed for the patient on the treatment plan.

13. **I understand** that I may revoke this consent to treatment at any time and that no further action based on this consent will be initiated except to the extent that treatment and procedures have already been performed or initiated.

14. **I confirm** that I am a legal guardian to the child referenced on the opposite page. **I also confirm** that I have read and understand this form or it was read to me, and that all blanks were filled in and all inapplicable paragraphs, if any, were stricken before I signed below.
